RE: Status Update Week ending December 19, 2010

Dear Mr. Beeman:

As requested, the following is a status update for the week ending December 19, 2010 for the activities relative to the work performed by McKim & Creed, P.A., MACTEC Engineering & Consulting, Inc. (MACTEC), Morrison Engineers, PLLC (Morrison), and Crowder Construction Company (Crowder). This update is not intended to be all inclusive, but a brief summary of the major activities and milestones.

1. Continued Phase II Stabilization Construction Activities. Highlighted work includes:
 - Completed the new diversion channel and associated berm as shown on detail 4 / ST-2 of the approved plans.
 - Initiated work to block water flow from the existing channel reaching the opening underneath the labyrinth walls of Prong 1 and 2. This work will ultimately result in the rerouting of water flow to the newly constructed diversion channel, thus allowing water to enter the structure through the controlled opening constructed in the west side of Prong 3 and pass over the spillway slab.
2. Held a Team call to review the status of the work performed to date, as well as the proposed schedule for the remaining work.
