RE: Status Update Week ending July 18, 2010

Dear Mr. Beeman:

As requested, the following is a status update for the week ending July 18, 2010 for the activities relative to the work performed by McKim & Creed, P.A., MACTEC Engineering & Consulting, Inc. (MACTEC), Morrison Engineers, PLLC (Morrison), and Crowder Construction Company (Crowder). This update is not intended to be all inclusive, but a brief summary of the major activities and milestones.

1. Received "Approval to Stabilize Remains of Dam – Addendum #1" letter dated July 12th, 2010 from the North Carolina Department of Environment and Natural Resources (NCDENR), Division of Land Resources. This letter was issued in response to the Team's submission dated July 9th of an addendum modifying the plans, specifications and design data for the stabilization of the remains of the subject dam approved by the original "Approval to Stabilize Remains of Dam" issued on July 8th, 2010.
2. Met with North Carolina Department of Environment and Natural Resources, Land Quality Section, Fayetteville office, to perform an Express Review of the submitted Erosion and Sedimentation Control Plan for the Emergency Response / Stabilization Work.
3. Performed Supplemental Exploratory Rock Drill Holes on the Spillway.
4. Initiated work on the spillway to improve water flow and allow checking for detrimental scour at existing footings of the lower spillway retaining walls, portions of which are associated with the Lakeview Road Bridge, as authorized by NCDENR approvals.
